Charity Assets Trust

SHARE PRICE PERFORMANCE SINCE LAUNCH ON 8 MARCH 2012

The fund fell back marginally over the month as equity markets continued to move higher, albeit in increasingly narrow fashion. The S&P 500 was up 4% over the last month, whilst the same index equal-weighted was down by 1%, this is illustrative of a world of fewer winners and more losers. There is an adage that when markets are broad, they are strong, but when they are narrow, they are weak.

Over the past nine months we have managed to maintain a level of protection in portfolios we believe will be essential when market conditions deteriorate. But in contrast to the second quarter of last year, the growth assets have contributed to ensure that the fund isn't retreating in the intervening period. This has been driven by proactive portfolio adjustments. Adding duration in the fourth quarter gave us a positive year end; an increased equity weighting and dynamic management of the portfolio's commodity exposure have supported returns this year.

There is something of a dichotomy at play in markets; many investors express concerns but these are not yet reflected in their positioning. In a recent Bank of America Fund Manager survey 69% of respondents consider the 'Magnificent 7' to be the most crowded trade in markets, meanwhile about half of those respondents expect large-cap US growth stocks (dominated by the same seven names) to lead the market higher. There is no telling how much crossover there was from individual respondents, but it indicates a market displaying both uncertainty and great confidence in a benign outcome, given the level of valuations. This is a potentially dangerous combination, particularly when positioning is increasingly extreme in nature (and when leverage is involved).

Our predominant contention in the short term is that investor positioning is yet to adjust to reflect higher risk-free rates. Investors are currently paid more than 5% to not take risk. Meanwhile, risk premiums (the additional return an investor should receive for coming out of cash) are low, particularly in the US. It might be the case that conditions remain benign, but the potential upside of that outcome is limited. This informs our continued focus on ensuring that the portfolio is well positioned to make money should the certainties break and take advantage of the opportunities any sell-off presents.

The yen remains a key protection; we see many reasons for the yen to strengthen, but key to its role in the portfolio is that if the yen is strengthening it is likely to be against a backdrop of financial stress. Credit spreads give us exposure should the current compressed nature of risk premiums reverse. If liquidity is less readily available, a significant re-pricing of corporate debt is likely. We must also remain conscious of the need to participate should the current benign environment persist; the combination of a 25% allocation to equities, a recently increased position in oil plus exposure to gold mining equities, should allow us to participate, but without compromising our capital preservation mandate.

One to twelve month performance figures are cumulative, all others are annualised. Source: Ruffer LLP, FTSE International. Ruffer performance is shown after deduction of all fees and management charges, and on the basis of income being reinvested. Past performance is not a guide to future performance. The value of the shares and the income from them can go down as well as up and you may not get back the full amount originally invested. The value of overseas investments will be influenced by the rate of exchange.

INVESTMENT OBJECTIVE

The fund will follow an 'absolute return' investment strategy. This means the Manager will not endeavour to track or 'outperform' a specific benchmark or stock market index, but instead seek to generate consistent positive returns regardless of the prevailing market conditions. The Manager expresses its absolute return approach through two principal investment objectives for the fund: 1) preservation of capital, which the Manager defines as not losing money on a rolling 12 month basis and 2) delivering consistent positive returns (through a combination of capital and income) greater than the return on cash (as defined by the Bank of England Bank Rate).

RESPONSIBLE INVESTMENT POLICY

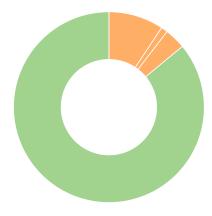

The fund has strict restrictions on investment in alcohol, armaments, gambling, pornography, predatory lending, tobacco, oil sands and thermal coal. It also follows a proactive voting and engagement approach with companies held within the fund. The fund is monitored against UN Global Compact principles, MSCI's ESG Metrics and the managers also monitor the fund's carbon metrics.

FUND TEAM

Jasmine Yeo

Joined Ruffer in 2017, having graduated with a degree from Warwick Business School. She is a member of the CISI, and co-manager of two of Ruffer's flagship funds and Ruffer's investment trust.

Ian Rees FUND MANAGER

Joined Ruffer in 2012, after graduating from the University of Bath with an honours degree in economics. He is a CFA charterholder and co-manager of three of Ruffer's flagship funds.

Jos North fund manager

Joined Ruffer in 2012 and now leads Ruffer's UK institutional business, including UK defined benefit, defined contribution and local government pension schemes, and UK charities. He is a member of the CISI and comanages two of Ruffer's flagship funds.

Ajay Johal FUND SPECIALIST

Joined Ruffer in 2014 from Barclays Wealth, moving to the charities team in 2019. He holds a degree in history and sociology from the University of Warwick and is a member of the CISI.

GLOSSARY

Volatility measures the extent to which returns vary over a given period. High volatility means returns have been more variable over time

Duration measures the sensitivity of a bond or fixed income portfolio's price to changes in interest rates. The higher the duration, the more sensitive the price or portfolio is to changes in interest rates

UK Bank Rate the rate the Bank of England charges banks and financial institutions for loans with a maturity of one day

Sharpe ratio measures the performance of an investment, adjusting for the amount of risk taken (compared to risk-free). The higher the ratio, the better the returns compared to the risk taken Sortino ratio measures the extra return an investment makes for each unit of bad risk (the chance of losing money below a certain target)

DISCLAIMER

Eligible charities are those registered as a charity with the Charity Commission for England and Wales, the Office of the Scottish Charity Regulator and/or Inland Revenue Charities, Bootle, Merseyside (including charities established in Northern Ireland), or exempt from registration with the Charity Commission by virtue of the Charities Act 1993 (as amended).
